Building Smarter Cities: Innovations for Urban Living

Transforming urban landscapes through intelligent technology and citizen-centric solutions

Made with GAMMA

The Need for Smart Solutions

Urbanisation Challenges in India

Traffic Gridlock

Indian cities lose 21 billion hours annually to traffic congestion, costing the economy billions in lost productivity.

Parking Chaos

70% of urban space is wasted searching for parking, adding to congestion and frustration for commuters.

Safety Concerns

Women's safety remains a critical issue with limited real-time assistance and emergency response systems.

Emergency Response

Delayed emergency services due to traffic and lack of intelligent dispatch systems affect citizen safety.

Made with GAMMA

Smart Traffic Management System

Reducing Congestion, Saving Time

AI-powered systems that dynamically adjust signal timings based on real-time traffic flow, reducing average commute times by 30% and improving fuel efficiency.

Made with GAMMA

Real-time Traffic Optimisation

AI-powered Signal Control & Predictive Analytics

01

Data Collection

Sensors and cameras capture real-time traffic patterns across city intersections

02

AI Analysis

Machine learning algorithms process data to identify congestion patterns and predict flow

03

Dynamic Adjustment

Traffic signals automatically optimise timings to reduce waiting and improve flow

04

Continuous Learning

System learns from historical data to predict and prevent future congestion hotspots

Made with GAMMA

Smart Parking Solutions

Sensors, Apps & Reduced Frustration

IoT Sensors

Embedded sensors detect available parking spots in real-time across designated zones

Mobile App

Users receive GPS-guided navigation to nearest available parking space via smartphone

Seamless Payment

Integrated digital payment systems enable quick booking and hassle-free transactions

Made with GAMMA

Innovation Showcase: 'Nari Raksha'

Women's Safety App with Live Tracking

Live Location Sharing

Real-time GPS tracking allows trusted contacts to monitor journey in safety mode

Panic Button

One-touch emergency alert sends immediate distress signal with location coordinates

Automated SOS

Shake phone three times to trigger automatic alert with audio/video evidence capture

Safe Route Guidance

AI suggests safest walking routes based on historical incident data and real-time conditions

Made with GAMMA

Emergency Alert System: 'Sahayak'

Instant Help, Geo-Fencing & AI Dispatch

Emergency Trigger

Citizen activates alert via app, call, or wearable device

Geo-Fencing

System identifies location and nearest response units automatically

AI Dispatch

Intelligent routing assigns optimal emergency services based on availability and priority

Rapid Response

Coordinated deployment of police, medical, or fire services within minutes

Made with GAMMA

Experience 'Sahayak' System

Live Demo Available

Explore how intelligent emergency response systems work in real-time with interactive simulation and case studies from pilot cities.

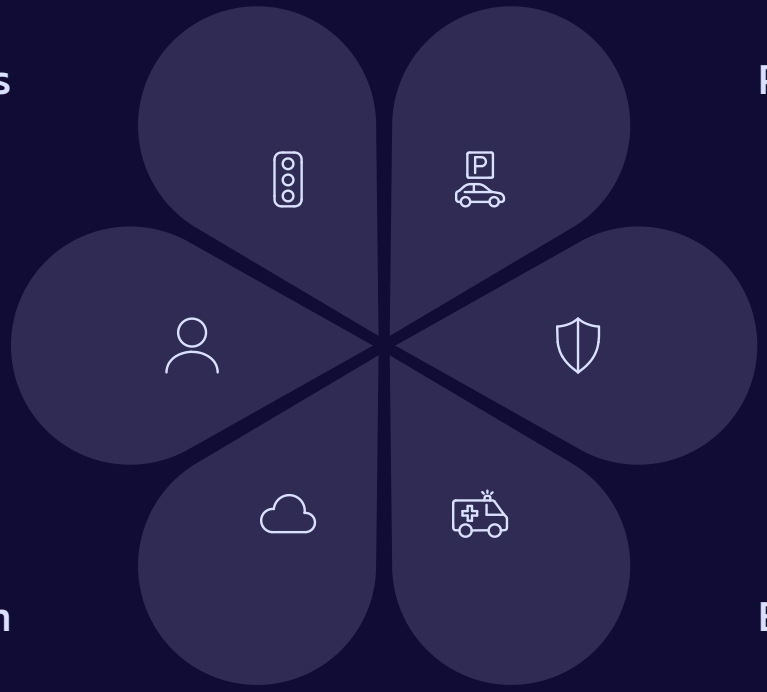
Integrating Smart Solutions

The Future of Urban Ecosystems

Traffic Systems

Parking Solutions



Citizen Portal

Safety Apps

Data Platform

Emergency Services

Unified technology platform connects all smart city services through a single data backbone, enabling seamless interoperability and coordinated city management.

Q&A and Call to Action

Your Role in Building Smarter, Safer Cities

Partner with Us

Government, private sector, and citizens must collaborate to implement these solutions

Pilot Projects

Start with small-scale implementations in select areas to demonstrate impact

Raise Awareness

Educate communities about benefits and encourage adoption of smart city technologies

Together, we can transform urban India into connected, efficient, and safe environments for all citizens.
